2025 General Ledger Review | Key Findings

Synthetic Dataset | Portfolio Project

1. Potential duplicate expense — £2,499.99

Bright Ads Ltd invoice **INV-10-SA-777** appears in two Sales journals: **1297 and 1298**, dated **14 and 15 October 2025**. Both record **£2,499.99**, and the second is described as “Campaign retainer re-entry”.

Potential impact: Expenses may be overstated by £2,499.99 if both entries relate to the same charge.

Recommended action: Check the original invoice, supporting documents and any reversal entries. Correct the posting if a duplicate is confirmed.

2. Annual expenses exceeded budget by £150.14K

Actual expenses were **£2.06M**, compared with a budget of **£1.91M**—approximately **7.9% over budget**.

Finance had the largest departmental overspend at **£248.19K**, partly offset by underspending in other departments. Marketing was the largest account-level contributor to the overall overspend.

Recommended action: Review Finance’s largest expenses and Marketing spending against approved budgets and supporting invoices.

3. Operations payroll exceeded budget in September–October

Operations payroll expenses were **£59,200.61** against a **£19,440** budget for those two months: **£39,760.61 over budget**.

Recommended action: Check the payroll entries and staffing records for the period, then confirm whether the budget needs updating.
